

Relevant Regulation, Reliably

Failing to meet regulatory obligations poses a host of challenges that can impact operational, financial, and reputational risks. Our service empowers your firm to tackle regulatory challenges.

Streamline your regulatory research with RegGenome's Content Retrieval service:

- ✦ Obtain all relevant regulatory documents tailored to your requirements within a fixed timeframe
- ✦ Rely on unaltered text as published by the regulator enriched with relevant document and sub document metadata, whilst ensuring proper permissions are in place for utilisation
- ✦ Stay on top of compliance with latest document versions and regular updates
- ✦ Simplify research and explore regulatory content by theme, jurisdiction, or publisher instead of sifting through countless websites
- ✦ Leverage our metadata to pinpoint regulatory obligations and increase operational efficiency
- ✦ Automate your workflows through integrations of our metadata into existing compliance tools

Why us?

Our data structures are jurisdictionally agnostic and anchored to regulatory standards developed in conjunction with regulatory experts convened by the University of Cambridge. We prioritise ethical data acquisition and maintain the integrity of source documents by providing users with unaltered regulatory text as published.

Flexible delivery options to meet your needs

✦ **Digital transfer of documents:** We provide tailored packages of organised documents with descriptions and user-friendly navigation transferred to your requested location.

✦ **Integrating into existing tools:** Enhance navigation and search capabilities through our rich metadata by consuming regulatory content seamlessly into your existing tools.

We have a tiered service model to suit different levels of demand. Our pricing structure is transparent and flexible to suit either

✦ **Ready-made application:** Access our content through a tailor-made search, annotation and workflow application to simplify surfacing and annotating relevant regulations.

Batch Option:
Ideal for one-time regulatory tasks

Batch-and-Update Option:
Suitable for frequent evaluation of recent legislative change

How it works

Access our customer environment by signing a services agreement with RegGenome

Customise your selection of regulatory themes, jurisdictions, and publishers

Refine your search with our taxonomy structures to identify specific regulatory obligations

View coverage of all regulatory initiatives relevant to your search

Set your desired relevancy thresholds to eliminate noise in retrieved documents

Select how you want to receive the output of your search request

Regulatory documents only

Metadata to enable easy navigation to find relevant documents

Signposts to regulatory obligations within each document

Contact us to learn more about the content we currently have in-scope
